STORYLINES

CHAMPIONSHIP

Rookie Kimi Antonelli leads standings as Mercedes finds 2026 sweet spot

The Italian teenager heads to Florida with 100 points, shocking the paddock while established champions struggle with energy recovery.

DRIVER MARKET

Verstappen linked to McLaren as Red Bull eyes Oscar Piastri replacement

Speculation intensifies over Max Verstappen's future following a difficult start to the new regulation cycle and Red Bull's performance slump.

TECHNICAL

ERS management becomes critical factor under new 50/50 power split regulations

Teams are battling 'clipping' on Miami's long straights, where electrical deployment now matches internal combustion output for the first time.

THINGS TO WATCH

Watch for the 13:00 local start time, moved three hours earlier to avoid forecast afternoon thunderstorms. The smooth asphalt favors the softest C5 compound for qualifying, but the race will likely hinge on thermal management of the C3 Hards in the intense Florida humidity.
