STORYLINES

CHAMPIONSHIP

Kimi Antonelli arrives in Miami as the surprise championship leader

Following a breakthrough victory in Japan, the Mercedes rookie leads the standings as the sport returns to Florida for the first Sprint weekend of the month.

TECHNICAL

New FIA energy management rules debut to solve lift-and-coast issues

Revised power unit deployment limits aim to eliminate awkward qualifying tactics and improve wheel-to-wheel racing following driver complaints from the opening rounds.

DRIVER
MARKET

Verstappen future remains focal point as Red Bull form fluctuates

Speculation regarding a potential move to Mercedes persists as Red Bull struggles to maintain its technical dominance under the 2026 regulations.

THINGS TO WATCH

Watch for the impact of the 13:00 local start time, moved three hours earlier to avoid late-afternoon thunderstorms. The smooth asphalt favors the softest C3-C5 range, but high thermal loads will make managing the C5 Soft a critical challenge during the high-speed Sprint dash.
